

Age Reversal

Address

- CNS and biocomputer
- Regeneration/rejuvenation, degeneration/aging
- Removal of aging cells, the half dead and alive cells, the half alive and dead cells
- Cellular overpopulation
- Blood circulation, lymphatic and energy (meridians)
- Lymphatics by the numbers
- Five Categories: especially previous life collective humanity and ancestral influences and identifications
- Increase flexibility of all joints especially those of the torso, hips, hands, feet, fingers and toes
- Increase all empty spaces between joints and structures

Facial reengineering

Skin

- 7 layers (epidermis, dermis, subcutaneous)

Facial muscles

- By the numbers

Cranial bones

- By the numbers

Eyes

- Increase size of the eyes and eye openings
- Strengthen all cranial nerves leading to the eyes (II, III, IV, VI)
- Reduce swelling under the eyes by considering encapsulations and merging dead cells and tissues
- Maximize lymphatic connections to and from those areas and merging lymphatics.

Nose

- Decrease width of the nose and increase the regeneration of the cartilage and bone of the nose
- Remove anything inhibiting the regeneration of the nose
- Strengthen the branches of the facial nerve number VII to the nose

Biochemistry, etc.

- Basic biochemistry
- HGH
- Sexual hormones
- Bio-resonance: Increase negative ions and EM charges, decrease positive ions and EM charges
- Basic waste removal: cellular and dead cell wastes, parasitic wastes and dead parasites
- Basic nutrients: water, oxygen, nitrogen, carbon

Hair

- Increase each follicle thickness
- Increase each hair thickness
- Growing more hair per follicle
- Having more hair follicles
- Strong hair and hair follicles
- Increase and strengthen the pigment granules (whose absence causes graying)
- Strengthen each hair follicle in the scalp.
- Eliminate the parasites mimicking the follicles and bulbs of each hair
- Improve lymphatic connection to all follicles
- Eliminate all basic waste products, increase estrogen and progesterone, and decrease testosterone

Structural

- Maintain bone strength and density by the above instructions for basic biochemistry, bio-resonance, basic waste removal and basic nutrients

Increase memories of youthfulness and decrease the forgetfulness of aging.

Increase youthfulness and decrease aging.

Check DNA for twisting and bends.

Test for Yuen homeopathics needed

Check if any other strengthening needed (such as organs or systems, fitness, specific non-physical causes, etc.)
